Good Afternoon Mr. Sam

I really don't have a lot of news regarding Seymour's submission to the Department of Natural Resources.....at least not yet. I do know that they have my submittal and that it meets the Department's Report requirements.

According to Jeremy Payne, Mr. Byron Shaw (who heads DNR's new technology group) wants to visit with me about Seymour's situation. I am not sure what that might be all about. All Jeremy said was "don't worry about it, its nothing bad". So, my guess is that Mr. Shaw will want to visit with me about the best way to handle odor control issues in a 3-phase process plant like Seymour's. (I have proposed a deviation from the Chapter Regs, which I had to do to keep the plant's process viable.) There may be other items too. But, I won't know for sure until Mr. Shaw contacts me.

If I learn more, I'll send an email or I'll give you a call.....OK?

Duane
